SUMMARY

BE (EXTC) student with practical experience building full-stack AI applications, serverless cloud backends, and embedded/digital systems. Comfortable across the stack – from REST API design and cloud integrations (AWS) to hardware datapaths and React/Next.js frontends. Actively expanding into DevOps and CI/CD. Looking for internship opportunities to contribute to real engineering problems and grow through hands-on product work.

EDUCATION

Bachelor of Engineering – Electronics & Telecommunication (EXTC)

Don Bosco Institute of Technology, Mumbai

Expected 2027

HSC (Science): 60.50% (2022) — SSC: 79.60% (2020)

TECHNICAL SKILLS

Languages	Python, SQL, C/C++
Backend	Flask, REST APIs
Frontend	React.js, Next.js, Tailwind CSS, shadcn UI
Cloud	AWS (S3, Bedrock, Polly, Lambda, DynamoDB)
Embedded & Digital	Arduino, STM32, ESP8266, FPGA (Verilog HDL)
DevOps & Testing	Git, GitHub Actions (CI/CD), JMeter, ZAP, Wireshark
Tools	scikit-learn, Scilab, KiCad, Cisco Packet Tracer
Currently Learning	Docker, Kubernetes, Linux, GCP, OCI, LLMs/NLP, Vector DBs

PROJECTS

Neta AI – Multilingual Government Scheme & Grievance Platform *AI for Bharat Hackathon (hack2skill × AWS), 2025*

- Deployed a live civic platform covering **10+ government schemes** across **WhatsApp and Web**, by building a serverless backend with **AWS Lambda** for webhook/conversation flow and **DynamoDB** for message state management.
- Enabled AI-powered assistance in **8 Indian languages** by integrating **AWS Bedrock** for eligibility checks and grievance classification, **AWS Polly** for voice output, and a **React.js** frontend with i18n and an admin dashboard.

WhereToNext – Tier-Ranked Travel Discovery Platform

Personal Project, Active

- Built a statically-generated travel guide site with an **interactive 3D globe** (react-globe.gl) and multi-mode fuzzy search (Fuse.js), using **Next.js (App Router)**, **TypeScript**, and **Tailwind CSS**.
- Designed a **Python** data pipeline (trafilatura + Playwright for scraping, Nominatim for geocoding) that AI-enriches and auto-tiers destinations **S–E** via a documented weighted scoring formula.

python-scripts – Open-Source Python Utility Monorepo

Personal Project, Active — 300+ scripts

- Building a growing, categorized collection of standalone Python scripts (automation, checkers, tools), architected for long-term scale toward 1000+ scripts.
- Set up an automated **CI/CD pipeline** via **GitHub Actions** enforcing code quality (black, isort, flake8, pylint, mypy, bandit, vulture, pytest) across Linux, Windows, and macOS on Python 3.12–3.14.

Other Projects:

- **8-bit ALU on FPGA + Live Dashboard** – Designed a full 8-bit ALU datapath in **Verilog HDL** (FSM input handling, Double Dabble decimal conversion) with a **Next.js** live-state dashboard.
- **AI Air Quality Prediction System – Random Forest-based 7-day AQI forecasting** from live STM32/ESP8266 sensor data, served via a **Flask** API and **React.js** dashboard.

ACHIEVEMENTS & ACTIVITIES

- **AI for Bharat Hackathon** (hack2skill × AWS, 2025) – Deployed Neta AI: live multilingual civic platform with full AWS cloud integration.
- **Smart India Hackathon (SIH) 2024** – Participated and submitted project for national-level screening.
- **Winner Nominee, International Space Science Competition (ISSC 2020)** – Nationally recognized for space science research project.
- **IETE Student Member** (2024–2027); actively designing open-source AI/DevOps tools (MCP servers, agent tooling) to stay current with emerging tech.
